

ES-10 SERIES
Horizontal Mount Vertical Airflow Up
Application and Design

The ES-10 series is a horizontally mounted backdraft damper that is designed to allow vertical airflow up and prevent reverse airflow. The damper is opened by air pressure differential and closed by gravity. Standard models include adjustable internal counterbalance to assist opening.

Leakage

Leakage testing was conducted in accordance with AMCA Standard 500-D and is expressed as CFM per sq. ft. of damper face area. All data has been corrected to represent standard air at 0.075 lb/ft³ (1.201 kg/m³).

Pressure Drop

Performance data results from testing a 36" x 36" damper in accordance with AMCA Standard 500-D using Figure 5.7B (no duct either side). All data has been corrected to represent standard air at 0.075 lb/ft³ (1.201 kg/m³).
